

Supply Chain Services

Bidding Online

Global4PL's bidding online solution is designed to streamline the entire contract process, offering a flexible, secure environment for contract negotiation, visibility, and control. Global4PL provides award winning supply chain consultants to guide you along the RFQ process. Global4PL helps maximize the savings, select the best providers, and improve compliance.

PO Visibility Tool

PO Horizon is an intuitive shipment visibility tool for all of the different users (Accounts Payable, Purchasing, and Logistics, etc.) in your company. PO Horizon will collect shipment data from multiple sources and present only the information you need to see. In addition, it will eliminate the multitude of user names and passwords giving the user access to shipment status information through just one web portal.

Document Retention Tool

As an importer and / or exporter, you are aware of the CBP (Customs & Border Protection) and BIS (Bureau of Industry & Security) recordkeeping regulations, whereby your company is required to keep all records of import and export transactions for a period of five years. Our online document center will not only help to satisfy the government's regulations, but it will also facilitate access for everyone in your company. You save time in searching for documents and money for storage space.

Import / Export Tool

Simply create your export paperwork online or integrate your ordering system with our export solution. Our export document and compliance tool has a simple interface, but it is coupled with a powerful denied-party search engine. For the Bureau of Industry & Security (BIS), you create consistent and compliant export paperwork with detailed lists of all denied-party searches performed. You can file your Shipper's Export Declaration (SED) directly with the Automated Export System (AES) and for your customers overseas, you can customize any of the available documents to suit your customers' individual requirements.

SCM Training

We emphasize best-practices in customer - oriented, solution-based training programs. Global4PL brings top organizational development experts to meet your company's goal of building a high-achieving supply chain team. Global4PL provides award winning supply chain training onsite, online, and on-demand. Global4PL also offers a unique train-the-trainer program designed to accelerate system adoption and lower overall training costs.

Consulting Services

Global4PL is an award winning supply chain consulting firm with its own unique suite of services helping companies rapidly evolve and implement global supply chain programs. Our consulting and implementation services yield an effective and efficient integration of process, systems and training. Our clients include high-tech, retail, and manufacturing companies.
